parameter
A B C D E F G H
model
A subthreshold KC activity can drive APL?
B per-claw inhibition can go negative?
C connectome APL weights?
D target response rate
E # spikes considered as a response
F per-claw dynamics?
G PN>KC connectivity type
H mean mixture suppression
(evaluation metric)
booleans (A,B,C,F)
False
True
NaN
model PN>KC connectivity (G)
